Professional Summary

Full Stack Java Developer with **3+ years of experience** designing and developing scalable enterprise web applications using **Java, Spring Boot, React, RESTful APIs, and Microservices**. Experienced in building secure backend services, developing responsive user interfaces, integrating **SQL and NoSQL databases**, and implementing end-to-end business solutions. Hands-on experience with **CI/CD pipelines using Jenkins**, **JUnit**, **Integration Testing**, and **Test-Driven Development (TDD)** to deliver reliable, high-quality software. Familiar with **AWS cloud services** and proficient in **Agile/Scrum methodologies**, **SOLID principles**, and clean coding practices, with a strong focus on developing scalable, maintainable, and performance-driven enterprise applications.

Education

Sahyadri College of Engineering and Management (VTU) *Mangalore, Karnataka*

B.E in Information Science and Engineering *August 2019 - May 2023*

- **CGPA:** 8.01 (First Class with Distinction)

Experience

Endava Solutions India Pvt. Ltd. - Formerly known as GalaxE Solutions *Bengaluru, India*

Job title: **Developer - Senior Technician** *August 2023 - Present*

- Endava Solutions is a global technology services company specializing in digital transformation, agile software development, and automation solutions. The company helps businesses accelerate product development, optimize processes, and innovate with AI-driven solutions across industries, delivering high-quality, scalable, and efficient technology solutions.

Key Responsibilities:

- Experienced **Full Stack Developer** with 3+ years in end-to-end web application development.
- Promoted to Developer - Senior Technician in January 2026 and Developer - Technician in 2025 for strong technical performance and consistent delivery of quality solutions.
- Developed responsive front-end components and scalable backend services, delivering end-to-end features for enterprise web applications.
- Utilized **Spring Boot with SSMS, PostgreSQL and MongoDB** to build a robust backend for the project.
- Contributed to application design discussions, providing technical solutions to support evolving business requirements.
- Designed, developed, tested, and integrated **RESTful APIs** supporting CRUD operations and seamless communication between frontend and backend services.
- Developed **JUnit** test cases for unit testing and participated in integration testing to ensure application reliability and maintainability.
- Regularly pushed code to **Git, GitLab** for version control, maintaining a consistent and collaborative development workflow.
- Regularly updated project progress in **OpenProject, JIRA** as part of Agile sprints, ensuring transparency and effective sprint planning.
- Collaborated closely with the team in daily stand-ups and sprint planning meetings, adapting **Agile methodologies** to foster a cohesive and efficient development process.
- Identified and resolved application defects through debugging, troubleshooting, and performance optimization to improve system reliability and user experience.
- Collaborated with Product Owners, QA engineers, and cross-functional development teams throughout Agile sprints to deliver high-quality software on schedule.
- Utilized **Jenkins** for CI/CD pipeline development, automating build, test, and deployment processes to ensure efficient software delivery.
- Conducted brainstorming sessions to generate innovative ideas and solutions, significantly contributing to the project's success.
- Followed **Test-Driven Development (TDD)** principles while implementing and validating application features using JUnit.
- Worked with a **microservices-based architecture** to develop, enhance, and maintain scalable backend services for enterprise applications.
- Conducted KT sessions for new joiners and facilitated continuous knowledge-sharing sessions within the team to promote skill development.
- Presented feature demos to the Product Owner, incorporating feedback into development.
- Familiar with **AWS** cloud services and cloud-native application development concepts.
- Performed **Integration Testing** to validate seamless communication between frontend, backend, and database components.
- Leveraged AI-assisted development tools such as **ChatGPT, Codex, and Windsurf** to accelerate development, troubleshoot issues, and improve code quality.
- **Technologies:** Java, Spring Boot, React, REST APIs, Microservices, MongoDB (NoSQL), PostgreSQL, SQL Server (SSMS), Git, Jenkins (CI/CD), JUnit, API Integration, Backend Development, Frontend Development, Agile Scrum, Debugging, Performance Optimization

Projects

Tech Refresh Program *Bengaluru, Karnataka*

Client Project for a Fortune 500 Fintech Company *September 2025 - Present*

- An enterprise-grade plan management application that supports the end-to-end lifecycle of financial plans, including creation, maintenance, validation, versioning, copying, and merging. The platform facilitates efficient data management, automates business workflows, and integrates with multiple enterprise applications to deliver secure, scalable, and reliable operations.

- Primary developer responsible for the end-to-end development, maintenance, enhancement, and production support of the GxCapture Tech Refresh Program using **Java, Spring Boot, and React**.
- Designed and developed responsive React components and scalable backend services using Spring Boot, delivering end-to-end functionality across the application.
- Developed and integrated **RESTful APIs** for plan creation, maintenance, copy, merge, and validation workflows, ensuring seamless communication between frontend and backend services.
- Optimized SQL queries and analyzed SQL Server stored procedures to support business logic, data validation, and reporting requirements.
- Implemented **2 major features** Plan Copy and Plan Merge from requirement analysis through production deployment within 2 months.
- Wrote **JUnit test cases** and engaged in integration testing following **Test-Driven Development (TDD)** practices to ensure application reliability.
- Identified, debugged, and resolved production and QA issues by performing root cause analysis and implementing effective fixes to improve application stability and performance.
- Managed deployments across QA, Pre-Production, and Production environments while supporting release validation and smoke testing.
- Created and managed **Change Requests (CRs)** for production releases, ensuring compliance with enterprise release management processes.
- Collaborated with client infrastructure teams to build and validate new Production and Disaster Recovery (DR) environments, improving application resilience and business continuity.
- Participated in **Agile ceremonies**, including sprint planning, daily stand-ups, backlog refinement, code reviews, and feature demonstrations with Product Owners and stakeholders.
- Regularly pushed code to **GitLab** using version control for code management and collaboration.
- Worked throughout the complete **Software Development Life Cycle (SDLC)**, including requirement analysis, development, testing, deployment, production support, and continuous maintenance.
- **Technical Skills:** Java, Spring Boot, React.js, SQL, Microsoft SQL Server, REST APIs, Git, Jenkins, JUnit, Integration Testing, TDD, CI/CD, Agile Scrum, SDLC

GxCapture *Bengaluru, Karnataka*

Core Product - Endava Solutions India *January 2024 - September 2025*

- GxCapture is a configurable and customizable benefits intent capture portal developed by GalaxE.Solutions. It benefits automation by capturing client intent data, facilitating seamless integration for business-to-business transactions. This tool supports manual operational processes and enhances data processing efficiency. GxCapture is part of GalaxE.Solution's suite of digital accelerators, including GxCare, GxClaims, and GxDash, which collectively aim to drive enterprise digital transformation in sectors like healthcare, financial services, and retail.

- Developed and maintained scalable backend services and **RESTful APIs** using Java and Spring Boot to support core business functionalities and enterprise workflows.
- Developed and maintained **microservice-based** components to improve application scalability, modularity, and maintainability.
- Developed complex business logic following clean coding practices to ensure scalability, maintainability, and high application performance.
- Worked with **MongoDB (NoSQL)** for efficient data storage and retrieval while integrating backend services with frontend components.
- Performed **unit testing and integration testing using JUnit**, following Test-Driven Development (TDD) principles to ensure application reliability and code quality.
- Deployed the application to the QA environment using **GitLab pipelines** after successful build creation and developed automation scripts to streamline the deployment process.
- Identified & resolved code quality issues reported by **SonarQube** scans and documented the fixes to ensure compliance with coding standards.
- Participated in **Agile Scrum ceremonies** including sprint planning, daily stand-ups, retrospectives, and requirement discussions with cross-functional teams.
- **Technical Skills:** Java, Spring Boot, React, REST APIs, JUnit, MongoDB (NoSQL), Git, GitHub, Jenkins, SonarQube, JWT, Agile Scrum

Skills

Technical Skills	Java, HTML5, CSS3, JavaScript, Spring Boot, React, React Native, AWS, Jenkins
Database Knowledge	Microsoft SQL Server (SSMS), PostgreSQL, MongoDB (NoSQL)
Methodologies	Agile Scrum, SDLC, Responsive Web Design, Test-Driven Development (TDD), Integration Testing
Miscellaneous Skills	RESTful APIs, Microservices, Git, JWT, Postman, SonarQube, Axios, ChatGPT, Codex, Windsurf
Soft Skills	Time Management, Teamwork, Problem-solving, Effective Communication, Leadership, Deadline Attainment

Certifications

2026 **Windsurf for Beginners: AI Coding Crash Course**, Udemy

2026 **GitLab — A Complete Hands-On for CI/CD Pipelines & DevOps**, Udemy

2025 **The Ultimate ChatGPT Guide with React Native - Develop Mobile Apps**, O'Reilly

2025 **Agile Project Management**, O'Reilly
